

Psoriasis Workshop

Thurs. January 19th 10:30am

Cliffside Park Senior Activity Center

550 Gorge Rd. Cliffside Park

201-943-3768

Up to 7.5 million Americans have psoriasis.

It's a chronic immune disease that appears on the skin.

Up to 30% of psoriasis patients develop psoriatic arthritis,
which impacts your joints.

Symptoms may get worse in the winter months due to dry
air, decreased sunlight and colder temperatures.

If you have condition join us for this informative workshop
and learn about its symptoms and treatment.
